

Build Your Weapons

Voivod

Build your weapon
Let me light the fire Build your weapons
These nations are overrun with you
Out of nation
To this end, we'll resist forever
Ready to kill all trashy Gods
With this machine, cry out fire The kids speed along when
The last night comes down I hear you win
You break the sound barrier
To race down the streets
We hear you sharpen the weapons Tonight the killer will come
With his smashing sound
Tomorrow behind you
Death will raise by your noise Build your weapons
These nations are overrun with you
Out of nation
To this end, we'll resist forever
Ready to kill all trashy Gods
With this machine, cry out fire The steel will be sold under the hammer
We will stir heaven and Earth
You'll bump one's head on the stage
And your music will be all the rage Suddenly a storm will sweep this town
The invaders and their weapons will be back
Move your ass build your kits
And face death again, again Build your weapons
Out of nation
Ready to kill all trashy Gods
With this machine, cry out fire Shoot At work to exist
Don't need restrictions
Raise the forceful fist
Forge ahead with fun As long as I live
I will cross our weapons
To heat up the steel
It's time for an ovation [Incomprehensible]
Tonight you will go with his smashing sound
Tomorrow behind you
Death will raise by your noise Build your weapons
Out of nation
Ready to kill all trashy Gods

With this fucking machine
