Mind Over Matter

Sahara Hotnights

Baby we're bored and bad luck is coming our way
We're the last of our kind with a last chance slipping away
They said it was a big disaster I heard it on the telephone
You called me the morning after
To ask me where our plan went wrongHey, we're too good to go along my friend
Mind over matter again
We're too young to get old like them
We can't make it better again
We can't make it better again
No we can't make it better againWhen it's all over just leave me to my own device
I should have known when to stop listening to your bad advice
They said it was a big disaster I heard it on the telephone
You called me the morning after
To tell me where our plan went wrongHey, we're too good to go along my friend
Mind over matter again
We're too young to get old like them
We can't make it better again
We can't make it better again
No we can't make it better againOh baby we're bored and bad luck is coming our way
Now that we know what's to come
Who's gonna keep us awake?I really wanna know now
Hey, we're too good to go along my friend
Mind over matter again
We're too young to get old like them
And we can't make it better againWe're too good to go along my friend
Mind over matter again
No more lies so we can't pretend
We can't make it better again
No we can't make it better again
Oh, we can't make it better again
Oh, we can't make it better again
