# Coming Home

## Inventions

There's a place that's far from my home
A little place that I can call my own
Somewhere I found along the way

I've fought, I've failed, I've tried
All these years so strong by your side
But now you say I'm in the way

I keep coming home to you
Wishing my life away on you
Get in line, or get out of my way
I've had it up to be here with you
I've been down on my knees for you
I've been here plenty before
So come what god damn may

There's something in this house that holds me back
As I try to make my way outside
It feels like losing when I win (losing when I win)
I know you said you've tried, to be the one that stays here by my side
But it feels like me that's gotta break

I keep coming home to you
Wishing my life away on you
Get in line, or get out of my way
I've had it up to be here with you
I've been down on my knees for you
I've been here plenty before
So come what god damn may (Hey!)

(Come what may!)
You'll be jealous forever
(Come what may!)
It gets better and better
(Come what may!)
Yeah let's say it together
(Come what may!)

You're wasting, wasting my time (wasting, wasting my time)

I keep coming home to you
Wishing my life away on you
Get in line, or get out of my way
I've had it up to be here with you
I've been down on my knees for you
I've been here plenty before
So come what god damn may.
