Don't Save Me

Sing It Loud

Dont save me
Im not the one you should be looking out for
Dont save me
I know its a lot to ask
But dont save me
This can make things way too complicated
Dont save me
I know I can make it on my own
Sometimes I like to think about you
And the words that come out your mouth
When things get rough
I wouldnt want to take another step forward, look
Can you tell me? Are you eager? Are you ready to call it love?
Can you feel it? Do you mean it? Can we burn this down?
Can we burn this down?
If I can ask a simple question
About the way that you call my name
Its so appealing, its deceiving
So come back another day?
Can we play this? Delay this? Or maybe find another way?
Do you mean it? Believe me? Can we burn this down?
Dont save me
Im not the one you should be looking out for
Dont save me
I know its a lot to ask
But dont save me
This can make things way too complicated
Dont save me
I know I can make it on my own
(ohh, ohh) Make it on my own
I know I said that Id be waiting
But the truth remains the same
The way you run could drive me crazy
Girl, you better not turn away
Put your guard down
The lights out, keep your feet flat on the ground
No more waiting around
Dont save me
Im not the one you should be looking out for

Dont save me
I know its a lot to ask
But dont save me
This can make things way too complicated
Dont save me
I know I can make it on my own
Baby, I got to make it on my own (Hey!) 2x
Dont save me
Im not the one you should be looking out for
Dont save me
I know its a lot to ask
But dont save me
This can make things way too complicated
Dont save me
I know I can make it on my own
