

Omega Point

Apollo 440

Hey what's this?
Yea, excellent I love this kind of stuff
Is this your track or is this?
Hey, have you just put some ? ? ? No longer any place mother nature can hide now
Far from space culture
Dazzling, spacial That the instant the omega point's reached ...
With gain control of all matter and forces
Now all mean a single universe
But in all universes it's existence is logically possible Life will have spread to all spacial regions in all universes
Which can logically exist We have stored an infinite amount of information
Including all this knowledge which is logically possible to know No longer any place mother nature can hide
Far from space culture Exude your phenomena, exude the phenomena Turn it on, dazzling, spacial My calendar,
the most concentric figuration of recorded time
You know the axis of the northern star shifts like two inches every year
And it ends near 2000 and 11 on the nears of 2011th on the last half of hour
Is aaa when time speeds up Come back, dazzling, spacial
Distant cosmos
