

This Is a Lie (Ambient Mix)

The Cure

How each of us decides
I've never been sure
The part we play
The way we are
How each of us denies any other way in the world Why each of us must choose
I've never understood
One special friend
One true love
Why each of us must lose everyone else in the world However unsure
However unwise
Day after day play out our lives
However confused
Pretending to know to the end This isn't truth, this isn't right
This isn't love, this isn't life, this isn't real
This is a lie How each of us believes
I've never really known
In heaven unseen and hell unknown
How each of us dreams to understand anything at all Why each of us decides
I've never been sure
The part we take
The way we are
Why each of us denies every other way in the world However unsure
However unwise
Day after day play out our lives
However confused
Pretending to know to the end This isn't truth, this isn't right
This isn't love, this isn't life, this isn't real
This is a lie This isn't truth, this isn't right
This isn't love, this isn't life, this isn't real
This is a lie
