

# Burn You Up, Burn You Down

Peter Gabriel

Straight as an arrow  
Carry our intentions through the wind  
Dogs all around you  
But your gonna get the message to your friend  
At every rendezvous you keep on looking around  
Nighttime in the city and the rain keeps falling down  
Let me tell you how it all works out  
Never thought we had so much time to lose  
Just learning how to twist and shout  
Doesn't matter much which damn beat you use  
Let me tell you how it all works out  
Never thought we had so much time to lose  
Just learning how to twist and shout  
Doesn't matter much which damn beat you use  
Heaven knows the road to go  
How many times we've told you so  
(Burn you up, we gonna burn you down)  
(Burn you up, we gonna burn you down)  
No rhyme or reason  
No way to make it easy 'til it's done  
(Burn you up, we gonna burn you down)  
(Burn you up, we gonna burn you down)  
So you cross onto the other side of the street  
(Burn you up, we gonna burn you down)  
(Burn you up, we gonna burn you down)  
Should know better than to keep turning up the heat  
Let me tell you how it all works out  
Never thought we had so much time to lose  
Just learning how to twist and shout  
Doesn't matter much which damn beat you use  
Let me tell you how it all works out  
Never thought we had so much time to lose  
Just learning how to twist and shout  
Doesn't matter much which damn beat you use  
Oh, hey make me feel this  
Hey hey hey, make me feel it hey  
  
When they lose you, it can bruise you  
(Burn you up, we gonna burn you down)

(Burn you up, we gonna burn you down)  
Break me open, I need someone to see me  
(Burn you up, we gonna burn you down)  
(Burn you up, we gonna burn you down)  
Make me feel it, make me feel  
In the city and the rain is falling down  
(Burn you up, we gonna burn you down)  
(Burn you up, we gonna burn you down)  
You can make it happen with your eyes, with your eyes alone  
Let me tell you how it all works out  
Never thought we had so much time to lose  
Just learning how to twist and shout  
Doesn't matter much which damn beat you use  
Let me tell you how it all works out  
Never thought we had so much time to lose  
Just learning how to twist and shout  
Doesn't matter much which damn beat you use  
Break me open  
(Let me tell you how it all works out)  
(Never thought we had so much time to lose)  
Make me feel it  
(Just learning how to twist and shout)  
(Doesn't matter much which damn beat you use)  
Break me open  
(Let me tell you how it all works out)  
(Never thought we had so much time to lose)  
Make me feel it  
(Just learning how to twist and shout)  
(Doesn't matter much which damn beat you use)  
You can make me feel it  
You can make me, you can make me, you can make me feel it  
You can make me feel it, you can make me feel it  
You can make me feel it, you can make me feel it  
You can make me feel it, you can make me feel it
