

# Wheels

Chely Wright

I've made you mad as hell, heard you yell  
But I've never seen you cryin'  
It's clear to us, it's serious  
We've never been this close to dyin' We've gotten way to reckless  
With the love I thought we treasured  
If we keep on like this  
We just might miss forever Baby, we never thought to swerve  
It's like we drove straight into the curve  
And, baby, we better hit the breaks and take it slow  
Get these wheels back on the road Why do I do what I do  
When I don't know what I'm doin'?  
I can see the hurt from the words  
That I'm throwing as they hit you Why can't I just shut my mouth  
And take some time to breathe?  
You'd think I'd know by now  
To think before I speak Baby, we never thought to swerve  
It's like we drove straight into the curve  
And, baby, we better hit the breaks and take it slow  
Get these wheels back on the road Our first kiss was in this car  
And how'd we end up where we are?  
Broken down in worlds apart Baby, we never thought to swerve  
It's like we drove straight into the curve  
And, baby, we better hit the breaks, we better take it slow  
And get these wheels back on the road  
Get these wheels back on the road
