

# Lifespan of a Fly

## The Bird and the Bee

All my children, all my loss  
You are not alone  
I must go, I'll miss you so  
My time has finally come All my lovers, all my lives  
Keep me in your minds  
Don't despair, don't chase the air  
Where we once lived together I have no regrets for anything I've done  
I feel like I've lived as good as anyone  
Remember me, remember me as best you can  
So I might live, outlive my lifespan Here I will lay from where I sprung  
This circle is completed  
The earth is warm, how I transform  
And now I am defeated
