Rescue Me

Ultra

I can't believe that I ever let you go
And assumed your heart was broken
I wanted a love where I could come and go
Now the door's no longer open
Why don't you take us back to then
No I'll never hurt you again
Now I know you're all I need
You gotta come on and rescue me (yeah, yeah)
Tell me what I should be, yeah
You gotta come on and rescue me
What do you want me to be? (ahh)
I realised that it's hard to be apart
You discovered it could be easy
And all I think of is why get together to break apart
You wonder why you loved me
You gotta come on and rescue me (yeah, yeah)
Tell me what I should be, yeah
You gotta come on and rescue me
What do you want me to be? (ahh)
Oh you're meaning the world to me
And I just wanna get up (get up), make up (make up)
Only you know how to save me
I need you now I need you baby
We'll live forever under the light of the moon, the stars
All things bright
(Tell me what I should do)
We go together heart and mind, we go together don't you find
(You gotta come on and rescue me)
And if you're ever stuck someday
(What do you want me to be?)
Turn around, call my name shout it out and into the air
I will be, I will be, I will be, I will be there
(You gotta come on and rescue me)
[Repeat till fade]
