

A Better Future

David Bowie

Please don't tear this world asunder
Please take back this fear we're under
I demand a better future
Or I might just stop wanting you
I might just stop wanting you
Please make sure we get tomorrow
All this pain and all the sorrow
I demand a better future
Or I might just stop needing you
I might just stop needing you
Give my children sunny smile
Give them moon and cloudless skies
I demand a better future
Or I might just stop loving you
Loving you, loving you
When we talk, we talk to you
When we walk, we walk to you
From factory to field

How many tears must fall
Down there below nothing is moving
I might just stop wanting you
I might just stop needing you
I might just stop loving you
I demand a better future
I demand a better future
I demand a better future
For I might just stop loving you
Loving you, loving you
I demand a better future
I demand a better future
I demand a better future
For I might just stop loving you
Loving you, loving you
I demand a better future
