

# She Said

## Cold

I'll be here alone, bury everything around me  
Her destinations unknown, I can't believe how she drowns me  
Well I won't deny, it's all the little things she said All alone, searched the world until she found me  
Her destinations unknown, I can't believe how she drowns me  
Well I won't deny, it's all the little things she said All this talkin', where's it goin'? Take the needle, rewind the  
show
