## **Proud Evolution**

## Liars

A sense of dread in our heart
And we wish the sense would fly away
In the night we're finding out
It will playProud evolution, Proud evolution

Proud evolution, Proud evolution

Proud evolution, Proud evolution

Proud evolution, Proud evolution

You should be careful

You should be careful

You should be careful

You should be carefulOur eyes can't tell how deep inside of the hundred billion potholes you can step in without knowing that you haveYou should be careful

You should be careful

You should be careful

You should be careful(Echoes and mumbling?) Proud evolution, Proud evolution

Proud evolution, Proud evolution

Proud evolution, Proud evolution

Proud evolution, Proud evolution

You should be careful

You should be careful

You should be careful

You should be careful
