

Love Changes Everything

Honeymoon Suite

There was a time
I wore a different face
I stood alone
Feelings had no place
I've givin' it all
Taking nothing back
You brought this lonely heart
Back in from the cold Just like a fire (fire)
Burning higher (higher)
You got my heart on a string
But now I know, love changes everything I don't need money
Don't need no fame
I gained only wisdom from so long in the game
I built such a wall
Love was just too dangerous
Turned around you were right behind me
There to catch my fall Just like a fire (fire)
Burning higher (higher)
You got my heart on a string
But now I know, love changes everything
Just like a fire (fire)
Burning higher (higher)
You got my heart on a string
But now I know, love changes everything Only a fool believes in a heart of steel
Yesterdays behind me now, whoa whoa Just like a fire (fire)
Burning higher (higher)
She's got my heart on a string
But now I know, love changes everything
Just like a fire (fire)
Burning higher (higher)
She's got my heart on a string
But now I know, love changes everything Just like a fire (fire)
You got me burning
You got me on a string
But now I know, love changes everything
Just like a fire (fire)
You got me burning
