

# Disaster

## Whiskey Rebels

I'm trying not to pretend that it wont happen again, and again like that  
Never thought it would end, cuz you got up in my head, in my head like that  
You made me happy baby, love is crazy, so amazing  
But it's changing, rearranging  
I don't think I can take anymore  
Cuz the walls burned up and our love fell down  
And it turned into whatever, now we're saying never  
Feel the fire cuz it's all around and it's burning  
For forever and always  
We gotta let it go, be on our way  
Live for another day, cuz it ain't the same, my baby  
Watch it all fallin to the ground  
No happy ever after, just disaster  
I didn't want it this way, I only wanted to say  
I loved you right  
But now you walkin away, and leavin me here to stay  
So foolish of me to wait for you to realize  
All the things I gave you, made you, change you  
Your dreams came true  
When I met you, now forget you  
Don't want anymore  
Cuz the walls burned up and our love fell down  
And it turned into whatever, now we're saying never  
Feel the fire cuz it's all around and it's burning  
For forever and always  
We gotta let it go, be on our way  
Live for another day, cuz it ain't the same, my baby  
Watch it all fallin to the ground  
No happy ever after, just disaster

You shot the bullet , you shot the bullet that killed me  
Not feeling my heart beat, and I was dyin  
I I've been through it, I I've been through the agony  
And now my eyes are, dryin, tryin, no more cryin,  
Like it's just a game,  
So disaster strikes and I'm all right  
Cuz my loves on his way  
Yeah  
Burning up forever and always (always)

yeah yeah yea  
Cuz the walls burned up and our love fell down  
And it turned into whatever, now we're saying never  
Feel the fire cuz it's all around and it's burning  
For forever and always  
We gotta let it go, be on our way  
Live for another day, cuz it ain't the same, my baby  
Watch it all fallin to the ground  
No happy ever after, just disaster  
Cuz the walls burned up and our love fell down  
And it turned into whatever, now we're saying never  
Feel the fire cuz it's all around and it's burning  
For forever and always  
We gotta let it go, be on our way  
Live for another day, cuz it ain't the same, my baby  
Watch it all fallin to the ground  
No happy ever after, just disaster  
Just disaster  
Oh whoa! Burnin up forever and always  
Always, yeah
