

# It Comes Back to You

## Imagine Dragons

4am beside myself  
and what I think of mental health  
all the things that worry me  
all the things you don't believe  
I've been told just what to do  
where to look and point my view  
all the things that I could be  
I think I learned in therapy I just a shadow you drew it comes back to you, it comes back to you  
all the things that you had lost will find their  
way to you  
it comes back to you, it comes back to you  
looking back into the past and I can  
see it through it comes to back you oh oh (x3)  
it comes back to you mocking birds and diamond rings  
oh I have thought of greater things  
all the things that fly by me  
all the lives that I could lead  
maybe I was born for that  
or maybe I was first to last  
you could call it cowardice  
but leave me to my studied bliss I just a shadow you drew [repeat chorus] it comes to back you oh oh (x3)  
it comes back to you
