Silver White Light

Terry Reid

This I'm looking for
I'm guilty of
Disregarding natures eyeI'm looking to the skies
I'm failing to observe the beauty
That's given unto meIt's just a silver white light
Silver white bright light night up above you
It's just a silver white light
A silver white bright light night up above youAnd as I look around
Something confounds
People blowing around looking through the air
Oh, looking for the prayerThat's why I just waiting here observing beauty
The one thing given unto meIt's just a silver white light
Silver white bright light night up above you
Oh a silver white light
Silver white bright light night up above youAbove you
Oh right up above you
Oh up above you
Up above you, woahOh yeah, right above you
