Lips Like Morphine

Kill Hannah

I want a girl with lips like morphine Knock me out every time they touch me I wanna feel a kiss just crush me And break me downKnock me out, knock me out Knock me out, knock me out 'Cause I've waited for all my life To be here with you tonight I want a girl with lips like morphine Blow a kiss that leaves me gasping And I wanna feel that lightning strike me And burn me downKnock me out, knock me out Knock me out, knock me out 'Cause I've waited for all my life To be here with you tonight Just put me on my back, knock me out againI want a girl with lips like morphine Knock me out every time they touch me I want a girl with lips like morphine To knock me outSee I've waited for all my life To be here with you tonight Just put me on my back Knock me out again
