Stars

Angel Olsen

I think you like to see me lose my mind
You treat me like a child I'm angry, blind
I feel so much at once that I could screamI wish I had the voice of everything
I wish I had the voice of everythingTo scream the animals to scream the earth
To scream the stars out of our universe
To scream at all back into nothingness
To scream the feeling til there's nothing left
To scream the feeling til there's nothing leftI'll close my eyes
I'll close my eyes so tightly for the world
Til you could change my mind with just a smile
And just before I turn to leave I think
I could use the thoughts you've given me
Oh I could use the thoughts you've given meTo sing the animals to sing the earth
To sing the stars into the universe
To sing it all back into something new
To sing for life or myself and leaving youWish I had the voice of everything, sometimes
Wish I had the voice of everythingI'll close my eyes
I'll close my eyes so tightly for the world
Oh for the world
Oh for the world
Oh
