

# Stars

Angel Olsen

I think you like to see me lose my mind  
You treat me like a child I'm angry, blind  
I feel so much at once that I could scream I wish I had the voice of everything  
I wish I had the voice of everything To scream the animals to scream the earth  
To scream the stars out of our universe  
To scream at all back into nothingness  
To scream the feeling til there's nothing left  
To scream the feeling til there's nothing left I'll close my eyes  
I'll close my eyes so tightly for the world  
Til you could change my mind with just a smile  
And just before I turn to leave I think  
I could use the thoughts you've given me  
Oh I could use the thoughts you've given me To sing the animals to sing the earth  
To sing the stars into the universe  
To sing it all back into something new  
To sing for life or myself and leaving you Wish I had the voice of everything, sometimes  
Wish I had the voice of everything I'll close my eyes  
I'll close my eyes so tightly for the world  
Oh for the world  
Oh for the world  
Oh
