

# White

**Ken Nordine**

White, white, white, white  
White, white, white, white  
Are there oceans full of things you never say?  
Are there skylines of the cities you don't see?  
Is there music muted playing underneath?  
Is mathematics keeping you from thinking free?  
Do you see lights?  
Turn your shadows white  
White, white, white, white  
White, white, white, white  
Don't let rain clouds  
Cry at all of your parades  
Let the other side of darkness kiss your face  
Into the sea, into the sea  
Do you see lights?  
Turn your shadows white  
Do you feel bright?  
Turn your shadows white  
All the things I want to say  
All the shadows in the way  
Do you see lights?  
Turn your shadows white  
Do you feel bright?  
Turn your shadows white  
White, white, white, white  
White, white, white, white
