

See Me Now

Cartel

And it's the same foregone conclusion
All the things hurt when I was young
It's the sample of delusion
Spit from everybody's tongue And I don't know how to be another
Don't know how to be the one
Oh, I have only just discovered who I am
And where I'm coming from If you could see me now
There'd be no purpose left to try and figure out
If you could see me now
You would be the last one in or out And we can talk about solutions
'Til we're red or blue in the face
And we can stare at our illusions
And just smile 'til the mirror breaks And I don't know how to be another
Don't know how to be the one
Oh, I have only just discovered who I am
And what I have become If you could see me now
There'd be no purpose left to try and figure out
If you could see me now
You would be the last one in or out There's no accounting the days
When you uncover what I see
And are you going away?
I swear it's only your mistake If you could see me now
There'd be no purpose left to try and figure out
If you could see me now
You would be the last one in or out If you could see me now
There'd be no purpose left to try and figure out
If you could see me now
You would be the last one in or out If you could see me now
There'd be no purpose left to try and figure out
If you could see me now
You would be the last one in or out
