Everything's Blue

Jeanette Williams

Okay
You been singing 'I got a witness'
Down in the bedroom, mindin' my business
Behind bars like an honest kid
[Incomprehensible]Flaunt your life, don't keep it a secret
Stay shallow, don't jump in the deep end
I don't do styles and you never did
The sky is cavin' in and going cool with it
Now everything's blue
We never see the world in black and white
The color we choose
In the morning is the color of the night
Of the night
Get your body, walk at the same time
'PTO on ice' in the dateline
From a time like now to a ten light years
Remember where we are, I'm gonna bring you tears
Husband screaming, 'I got a witness'
UFO, I don't wanna miss this
I don't leave smiles and you never did
The sky is cavin' in and goin' cool with it

Now everything's blue
We never see the world in black and white
The color we choose
In the morning is the color of the night
If dreams were trouble
I'd be rubbing shoulders with thieves tonight
Whoa, whoa
And you can beat it, baby now my mind is blown
I found a universe to call my own
Now everything's blue
We never see the world in black and white
Color we choose
In the morning is the color of the night
Of the night
I don't wanna miss this
Don't wanna miss this
You don't wanna miss this

Don't wanna miss this
I don't wanna miss this
Don't wanna miss this
You don't wanna miss this
Don't wanna miss this
