

# Monolith

## Mudvayne

{ We seem to be suggesting that our Evolution, I suppose, from the animal kingdom  
Into the human kingdom itself was catalyzed, or, or triggered by our encounter with these hallucinogenics,  
and} { Yes, we are an ape with a symbiotic relationship to a mushroom, and that has given us self-reflection,  
language, religion and all the spectrum of effects that flow from these things} { And one can only wonder how  
these hallucinogens might effect our future  
Evolution as well} { They have brought us to this point, and as we make our relationship to them conscious, we  
may be able to take control of our future evolutionary path} { Hallucinogenic chemicals have supposed to have  
had an enormous impact on shaping psychotic and various cultures both pre-literate and literate, there is  
definitely some kind of monolith }
