Thing for you

Sknit

Well, now that it's morning
Where do you want to go from here?
Well, now that we're sober
Are your thoughts of me more clear?
And now that your head is right
Did you dig last night?
It keeps playin' in my mind
'Cause girl I got a thing for you
And I think it's kinda crazy
'Cause I know that you have someone too
Wonderin' where you were last night
For now we'll say goodbye
But don't think we're through
I got a thing for you
Well, now that you're home
Will he be the first thing that you see?
I know you'll compare us
How does he match up next to me?
And now that your head is right
Did you dig last night?
It keeps playin' in my mind
'Cause girl I got a thing for you
And I think it's kinda crazy
'Cause I know that you have someone too
Wonderin' where you were last night
Girl I got a thing for you
And I know the night was hazy
But I still remember wakin' up
And kissin' your neck one more time
For now we'll say goodbye
But don't think we're through
I got a thing for you
Well, I remember layin' your head down
I remember lovin' all your sounds
I got a thing for you
And I think it's kinda crazy
'Cause I know that you have someone too
Wonderin' where you were last night
So girl I got a thing for you

And I know the night was hazy
But I still remember wakin' up
And kissin' your neck one more time
For now we'll say goodbye
But don't think we're through
I got a thing for you
