Lovin' Understandin' Man

Charley Pride

My baby changes like the weather one day she's warm and then she's cold
But some day I'll understand her better in a thousand years or so
But as long as there's blue sky above me and as long as there's life in my hand
My baby knows I always will be her lovin' understandin' manMy baby rocks me like the ocean don't know which way she's gonna go
But maybe some day she'll find direction in a thousand years or so
But as long as there's blue sky...
[guitar]
But as long as there's blue sky...
Her lovin' understandin' man
