Firefall

Tiger Army

Like ancient glaciers cutting wide
We leave our mark upon the Earth
When the glaciers melt and fall, evaporate and dry
You will sense our spirit here when memories have diedChange water...to fire
Falling into the night
A love call...burning forever
Through your heart into your mind-
Let the fire fall tonightWe're going to bring back the old ways
That you never knew, but somehow lie within
And when you look up to the heavens
That's a good place to begin
