

Don't Count Me Out

Eric Martin

Baby, let me catch my breath
Don't say a word
Let me shake it off
I feel like i'm falling
After all the things i did
I did for us
Now you turn around and say
I'm not the man i was
If you gotta go, you gotta go
You should know this ain't over
Don't count me out
Even the sun goes down
Baby, don't count me out
Everything comes around
And i still love you
Smoke another cigarette
From flame to ash
I'm not gonna blame myself
For the consequence of love
For everything that hurt
I guess a lesson's learned
I was there for you
Ain't it funny how the table's turned
Mabye in a way it's no surprise
I never really thought you'd say goodbye
Don't count me out
Even the sun goes down
Baby, don't count me out
Everything comes around
And i still love you
More than you will know
You will know
Baby, don't count me out
Everything comes around
You know that i still love you
Don't count me out
(even the sun goes donw)
Don't count me out
(even the sun goes down)

Don't count me out
(even the sun goes down)

Don't count me out
(even the sun goes down)
