

Sadder

Nik Day

I wish that I can make you smile,
But its more difficult than I thought it could be

Well I could crack a joke,
The best ever invented,
But you'd probably get offended
Well I could tickle your feet
and give you good things to eat,
So you don't even have to get out of bed

(Chorus)
But none of it would matter,
It would probably make you sadder instead

Well I could hire you a clown,
To follow you around,
And make you animals out of balloons.

But because of the state that you're in,
You'll probably pull out a pin
And pop them all the room back crying to your room

Well I could take you away to some exciting place,
Then take back every mean thing that i've said

(Chorus)
But none of it would matter,
It would probably make you sadder instead

Well I could practice making faces
In the mirror all day
Or I could join the circus and get horrible pay
I know you've got it in you,
Theres no reason to continue this waaaaaayy

I wish that I could make you laugh
If only just a little bit
A little bit is really quite a lot
But if you can't
I've come to the conclusion,

That you're losing,
Every good thing that you got

Well I could buy nice things
I could dance , I could sing
To a car
Or stand on my head

(Chorus)
But none of it would matter,
It would probably make you sadder instead

Well i could practice making faces
In the mirror all day
Or i could join the circus
And get horrible pay

I know you got it in you
Theres no reason to continuie this
Waaaaaayy

I wish that i could make you smile
But its more difficult,
Than i thought it could possibly be
Well i could crack a joke
The best ever invented
But you'd probably get offended
Well i could tickle your feet
And give you good things to eat
So you don't even have to get out of bed

(Chorus)
But none of it would matter,
It would probably make you sadder instead
