This Time

Uncle Kracker

It still feels good
You were always there to bring me breakfast in bed
And when I stayed out late you had some powder for my head
I've been a bad man
But you never paid no mind
We've had some long nights
But we're alright this time
I believe in something I just don't know what it is
And every time I climb I wind up back on the skids
You always stood by me
When the natives start to whine
We've had some long nights
But we're alright this time
We've had some long nights
But we're alright this time
You're like an angel with a twelve gauge
You're like a wheel man on a get away
And together we ride
You ain't Bonnie, I ain't Clyde
But we made it out of town just the same

I could take a taxi but it's better when you drive
You always come between me and the mess outside
I could buy you a ring
But you'd rather have the cash
And that don't even rhyme
We've had some long nights
But we're alright this time
And together we ride
You ain't Bonnie, I ain't Clyde
But we made it out of town just the same
I could take a taxi but it's better when you drive
You always come between me and the mess outside
I could buy you a ring
But you'd rather have the cash
And that don't even rhyme
We've had some long nights
But we're alright this time
We've had some long nights

But we're alright this time
We've had some long nights
But we're alright this time
