

Drive

Rex Goudie

We'll go where there's lights out
The night's out of starlight anyway
Maybe we'll find out
I'll catch you before you run away I can feel my heart out loud
Like a radio without a sound Are you waiting for a new morning
Are you waiting for my hands on your skin
If you're waiting for what might have been
I'll stay awake
You close your eyes
And I'll just drive Maybe somewhere
There's nowhere better than right now
We are like windows
And jet planes high above the clouds Like a train of crush of dreams go by
Rain clouds full of you and I Are you waiting for a new morning
Are you waiting for my hands on your skin
If you're waiting for what might have been
I'll stay awake
You close your eyes
And I'll just drive I'll stay awake
With you
One more night
With you
One more dream
Come true Are you waiting for a new morning
Are you waiting for my hands on your skin If you're waiting for what might have been (And I'll just drive)
Are you waiting for a new morning (And I'll just drive)
Are you waiting for my hands on your skin (And I'll just drive)
If you're waiting for what might have been
I'll stay awake
You close your eyes
And I'll just drive
