A Love That Will Last

Steve Tyrell

I want a little something more
Don't want the middle or the one before
I don't desire a complicated past
I want a love that will last
Say that you love me
Say I'm the one
Don't kiss and hug me and then try and run
I'm through with heartache
You're living too fast
I want a love that will last
I don't want a just a memory
Give me forever
Don't even think about saying good-bye (good-bye)
'Cause I want just one love to be enough
And remain in my heart till I die (till I die)
So (so) call me romantic
Oh, I guess that's so
There's something more that you oughta know
I'll never leave you
So don't even ask (so don't even ask)
I want a love that will last (I want a love that will last)
Forever
I want a love that will last (I want a love that will last)
I don't want a just a memory
Give me forever
And don't even think about saying good-bye (good-bye)
'Cause I want just one love to be enough
And remain in my heart till I die (till I die)
So (so) there's just a little more that I need (more that I need)
I wanna share all the air that you breathe
I'm not the kinda guy to complicate the past
I want a love that will last (I want a love that will last)
Forever
I want a love the love that last (I want a love that will last)
Always
I just want a love that will last (that will last)
