

# Girl Blue

Stevie Wonder

Hello morning, good, good morning to the one I love  
Crystal ringlets paint a picture of a gold sunrise above  
Little girl you're sad though all you have  
Is visible to you within your heart  
There stays a part that like the sky is blue  
Shifting breezes, grace the inner spectrum of your glance  
Leaves on branches, for your pleasure, perform a soothing dance  
Little girl it seems in all my dreams  
Your happiness is due  
But still they last there in your past  
Events that make you blue  
Thoughts of love are in your mind  
Yet splintered hopes push them aside  
A look at life is what you need to try  
In an instant there'll be sunshine, sprinkled every place  
Drops of rain will kiss the softness of your lovely face  
Little girl be fair show yourself you care  
Let others care for you before it's too late  
'Cause time won't wait till your heart's no longer blue  
Little girl be smart don't break your own heart  
There is love waiting for you before it's too late  
'Cause time won't wait till your heart's no longer blue
