Contagious

Granian

She's like a drug when you're addicted to love
That elusive answer that you can't think of
Slowly pulling you in like she's been sent from up above
She's like a pill you get your fill
But then you still need more
She's all up in your face in such a way you can't ignore
Her standing there

Maybe this will be good for you
(Like falling down)
Maybe all of this will be good

Lay down in her open sky
You're still waiting for her moon to rise
She's contagious
She's like a dream but none you've ever seen
Turns you into the man you never thought you could be
Now that we're all alone she said
This is just between you and me anyway

Maybe this will be good for you
(Like falling down)
Maybe all of this will be good

Lay down in her open sky
Still waiting for her moon to rise
She's contagious
Face down when you realize
All the love in this room has been swept aside
Come save us or just me

Sometimes she's gonna treat you like
You've never done anything right
You were never more than a lover
And she was never more than just a dream
