

# Feed It

## Bodyjar

You're telling me that your always broken And when you're sick but you don't know why Your gonna be what you always hated You've got something in your eyes Look now, your throwing it away Forget the benefits of today You've got the reason you live your life everyday Right now, its time to get away Gotta feed it to let it go Gotta stay on a one G basis I won't abuse it, your own oasis Look now, your throwing it away Half the weight and twice my lies Forget the benefits of today Right now, its time to get away You've got the reason you live your life everyday (X2) You're telling me that your always broken Your gonna be what you always hated And when you're sick but you don't know why You've got something in your eyes Look now, your throwing it away Forget the benefits of today Right now, its time to get away You've got the reason you live your life everyday (x2)
