From The Heart

John Whelan

There was a time when our dreams felt so real
Just out of reach but not too far to feel
Together we'd finally make then come true
'Cause anythings possible when I was with youBut they kept on saying we'd never amount to anythingAll of the dreams we've built up from the ground
They never believed them they just tore them down
We will rebuild them from the start
We will rebuild them from the heart'Cause once all we wanted seemed so far away
But with every step it was closer each day
The more that we tried it was within our grasp
The more that they told us that it wouldn't lastAnd everyone said we were crazy for giving up everythingAll of the dreams we've built up from the ground
They never believed them they just tore them down
We will rebuild them from the start
We will rebuild them from the heartFrom the heart
From the heart
From the heartAll of the dreams we've built up from the ground
They never believed them they just tore them down
We will rebuild them from the start
We will rebuild them from the heartAll of the dreams we've built up from the ground
They never believed them they just tore them down
We will rebuild them from the start
We will rebuild them from the heartFrom the heart
From the heart
