

Guess Who's a Mess

Brad Sucks

There you go you take your medicine
Even though I see the medifen
Will control nearly everything
That you know, ah well, it's not enough

Everybody says you're so messed up
But you're no idiot on the sidelines
Take a chance on a modern drug
And maybe you'll survive the night, alright

It's amazing what they do today with
Animals and chemicals and makeup
Looking good to me so hit the pavement
Hard to say you're not already famous

If there's a place you should be
Call the albumlance and they'll take you there for free
Tryin' to look as sick as you're on a magazine
Take a trip on the downside, ah well, it's not enough

Everybody says you're so messed up
But you're no idiot on the sidelines
Take a chance on a modern drug
And maybe you'll survive the night, oh yeah

It's amazing what they do today with
Animals and chemicals and makeup
Looking good to me so hit the pavement
Hard to say you're not already famous

You say you wanna try
But you can't get it right
You think that you're so bright
Why do the same thing twice?
If you can take your life
Then you can fake a smile
And either way you die, yeah
It's not enough!
