

Lost at Sea

Eisley

Sailing over wave and tide, ohh
Fantastic waves against our sides, ohh
And I'm not so afraid, lost at sea, as I should be
And I'm not so afraid, lost at sea, you and I, you and me
Congratulations 'cause we've made it
All the way home, all the way home
And you know that until the stars fall
I'll always love you, I'll always love you
The mystery of salt and sea, ohh
Has never been intriguing, ohh, and to me but the sea
Green is set so beautifully against your thoughtful face
That I must close my eyes and turn my face
Congratulations, 'cause we've made it
All the way home, all the way home
And you know that until the stars fall
I'll always love you, I'll always love you
Still floating soft, I am dreaming and I'm glad
I lost and still with my fingers
I'm drawing circles in the water, in the water
And still, still you're always there
Congratulations, 'cause we've made it
All the way home, all the way home
And you know that until the stars fall
I'll always love you, I'll always love you
