## Day Job

## **Gin Blossoms**

Well, we've been here once before And we've stuck it out for more When we come around We'll settle down the cracks below the floor Has it been eleven years Since I've stood here with my peers And we started out to conquer doubt and Frisbee I should've been a whole lot farther I'm never going back to college For just one good day job You're not missing much for sure Only everything that's yours At times it fails and we're full sail in the gutter Is this home 'cause I forgot If it is, then thanks a lot 'Cause I can't pretend to know one end from the other I should've been a whole lot farther I'm never going back to college For just one good day job You're not missing much for sure Only everything that's yours At times it fails and we're full sail in the gutter Is this home 'cause I forgot If it is, then thanks a lot 'Cause I can't pretend to know one end from the other I should've been a whole lot farther I'm never going back to college For just one good day job I should've been a whole lot farther I'm never going back to college For just one good day job Day job, day job, day job
