

Do What the Night Wants

Brantley Gilbert

Advisory - the following lyrics contain explicit language:

So we're trying to play our cards right
But I ain't ever liked playing by the rules
I should probably take you home, right
But I don't know about you
Baby I got a little wild side,
(I think you got a wild side too)
I don't wanna say goodnight
I wanna howl at the moon Let's do what the night wants
Shut the lights off, let the moonlight lead the way
Stay off the main roads, crank the radio
And let it play all our cares away
And if you want, I can take you home
But if you don't wanna be alone
Let's do what the night wants Baby girl I know you're curious
So I might as well get it out the way
I ain't trying to seal no deal girl
I know you'll make it worth the wait
And I want to know you a little more
(I think you want to know more too)
I could walk to your front door
We could howl at the moon Let's do what the night wants
Shut the lights off, let the moonlight lead the way
Stay off the main roads, crank the radio
And let it play all our cares away
And if you want, I can take you home
But if you don't wanna be alone
Let's do what the night wants
Let's do what the night wants We could look up in the morning
Shooting birds up at the sunrise
Yeah, but right now in this moment
Let's let it ride
And do what the night wants

(*Laughs* hell yeah, what you say baby)Let's do what the night wants
Shut the lights off, let the moonlight lead the way
Stay off the main roads, crank the radio
And let it play all our cares away
And if you want, I can take you home
But if you don't wanna be alone
Let's do what the night wants
Yeah, let's do what the night wants
