

Sin With A Grin

Shinedown

Take a good look at agony
Force fed pass down time release
I'm inspired to find the liar
Black list X on the back of a soulful man
I've got ways you understand
Look left, look right but I'm behind you
I never noticed until I focused
On everything you did, you said
You lit the fuse inside my head
Thank you for reminding me of why I'm sick inside
Thank you for the venom, did you think it would paralyze?
These scars I scratch, I tear are there under my skin
Where you've always been
Thank you for reminding me to sin with a grin
Hangman standing on a twisted 2 by 4
Built your house but forgot to lock the door
I'm inside with two black eyes
I have not one shred of sympathy
I have no use for apologies
I'm inspired to find the lie
I never noticed until I focused
On everything you did, you said
You lit the fuse inside my head
Thank you for reminding me of why I'm sick inside
Thank you for the venom, did you think it would paralyze?
These scars I scratch, I tear are there under my skin
Where you've always been
Thank you for reminding me to sin with a grin
Thank you for reminding me of why I'm sick inside
Thank you for the venom, did you think it would paralyze?
These scars I scratch, I tear are there under my skin
Where you've always been
Thank you for reminding me of why I'm sick inside
Thank you for the venom, did you think it would paralyze?
These scars I scratch, I tear are there under my skin
Where you've always been
Thank you for reminding me to sin with a grin
Sin with a grin, sin with a grin, sin with a grin
