

# Fire

## Waaheed

You make light from dark, illuminate my heart  
It started with a spark and now I'm consumed  
I know that it's Your will, so I'm gonna shine until  
I'm a city on a hill and they can see You  
And know You  
And know You inside  
You set me, You lit me, I'm on fire  
What a beautiful sight to see, I'm on fire  
Until my light is burning bright  
I'm gonna lift Your name and let this flame get higher, fire  
Let Your fire feed on all my disbelief  
'Cause You are all I need, You're contagious  
Like a blaze I can't contain, it never fades away  
It's sunshine through the rain, that's what Your love is  
And I know  
And I know inside  
You set me, You lit me, I'm on fire  
What a beautiful sight to see, I'm on fire  
Until my light is burning bright  
I'm gonna lift Your name and let this flame get higher, fire  
I wanna show 'em You're the only one  
Show 'em You're the only one  
You're the only reason why I'm on fire  
You set me, You lit me, I'm on fire  
What a beautiful sight to see, I'm on fire  
Until my light is burning bright  
I'm gonna lift Your name and let this flame get higher, fire  
You set me, You lit me, I'm on fire  
What a beautiful sight to see, I'm on fire  
Until my light is burning bright  
I'm gonna lift Your name and let this flame get higher, fire
