

# No Question

## Allure

Concentrate, listen to me, while you do me  
Should I surrender when you pursue me?  
You think a man don't have heart and soul  
When a hand's that good, anybody will foldIt's like poetry in motion  
But the heart regulates the devotion  
Love is floatin' in a sky blue ocean  
Think about itFeel the motion, young queen  
It reminds me of a smoothed out movie scene  
Two bodies intertwined on the screen  
Everybody make love in their dreams, but this is real, know I meanPassion is the way of the world  
Electricity when boy meets girl  
And making love is the key  
A burning flame that will last eternallyYou should know that I'm here for you  
As long as you see me through  
I would give all I have just to be with you  
Don't you see honey, it could be me and youI really look forward to being with you  
When you're not around I don't know what to do  
You give me a feeling that I can't control  
You take my heart and soulNever question what I do  
'Cause you need me baby and I need you  
So there's no need for you to have no fears  
Without a doubt I will be hereNow I know what I want to do  
Everything's all right as long as I'm with you  
Oh, don't you understand I don't want to be alone  
Baby, don't you know?I really look forward to being with you  
When you're not around I don't know what to do  
You give me a feeling that I can't control  
You take my heart and soulNever question what I do  
'Cause you need me baby and I need you  
So there's no need for you to have no fears  
Without a doubt I will be hereNever question what I do  
'Cause you need me baby and I need you  
So there's no need for you to have no fears  
Without a doubt I will be hereNever question, you should never question  
'Cause you need me baby, yeah boy  
So there's no need for you  
Without a doubt I will be hereNever question what I do  
'Cause you need me baby and I need you  
So there's no need for you to have no fears

Without a doubt I will be here
