Universal

Hypernova

Time flies
But so do aeroplanes
I got high, I came down again
I saw the light, I came back for
I saw the light, I came back for you

Let me live, let me love again
Let me live, let me love again
I just want another moment, I just want another moment with you
We are one, and we are free
The world to love and so are we
We kiss and hug, we sleep and dream

You cannot force a plant to grow
You cannot force the rain to go
You cannot force the sun to shine

I don't have all the answers
I don't have all the answers
The one thing that I am sure of
Love is universal

I got high, it ain't my soul
I got high, it ain't my soul
I gave it all but they just want more
I gave it all but they just want more

We are one, and we are free
The world to love and so are we
We kiss and hug, we sleep and dream

You cannot force a plant to grow
You cannot force the rain to go
You cannot force the sun to shine
