

Over The Rails & Hollywood High

Remy Zero

Television is the condition of my connection
To the machine and in its warm glow
We watched the flames grow
Till the bones show, till it stripped you clean Well I had it bad
We were barely on the screen
With the trips I had
Swallowed everything, except for you Now the last great Hollywood high
Stole right over the rails and I'm
The last great Hollywood high
After it shows who knows, where it will go? Halloween dust came between us
It always seemed just in the way
It's the decision, your script revision
All the stars evolve, but the story's the same Well I had it bad
You were barely on the screen
With the trips I had
Swallowed everything, except for you And now the last great Hollywood high
Stole right over the rails and I'm
The last great Hollywood high
After it shows who knows, where it will go? Well I've had it bad
I was barely on the screen
With the trips I had
Swallowed everything, well I've had it bad, except for you Now the last great Hollywood high
Stole right over the rails and I'm
The last great Hollywood high
After it shows who knows, where it will go? Last great Hollywood high
Last great Hollywood high
After it shows who knows
Where it will go?
