

Wild One

Carmen

Muted]

Live free, wild one

Young girl, wild one

Live free, wild one

Young girl, you're just a wild one If you're here now listen to the sound that's

Making feelings, create all emotions Oh we're crazy, stupid, insane

But we live for the moment

We take chances, all these incidents

We've never known

Live free, wild one

Young girl, wild one

Live free, wild one

Young girl, you're just a wild one

(You're just a wild one) If you thinking you can't find your way tonight

Well there's remedies that we can try Oh we're crazy, stupid, insane

But we live for the moment

We take chances, all these incidents

We've never known

Live free, wild one

Young girl, wild one

Live free, wild one

Young girl, you're just a wild one

(You're just a wild one)

Live free, wild one

Young girl, wild one

Live free, wild one

Young girl, you're just a wild one

(You're just a wild one)
