

Love in a Minute

Heartbreaka

I aint felt love in a minute, and my heart don't beat no more
I been up all night feeling like I don't sleep no more
All these bitches on my dick, I don't need no more
With this gun on my hip, what you need that for?
I been runnin for shit, even three times four
I been on my grind like six times four
Grind like I really don't eat no more

Damn, hey mom was all the hommies
I miss havin' real ones beside me
Dealin' with all these Demons inside me
Like what you gon do with your siemen inside me?
She got the abortion, now nah I ain't cryin'
Losin' my mind tell me how can I find it?
I just need love, give a fuck bout this island
I just need drugs, give a fuck if I'm dying

(Hook)

I just need someone to talk to, someone to listen
Ain't feeling myself feel like something been missing
Ain 't prayed in a minute, they just don't get it
I just need someone to talk to, someone to listen

She hate when I'm outta town
But love when I come around
But she got a man and some kids,
Now you know I can't trust that bitch
She livin' with him but tell me that she love me
And She want a relationship
He on his way home, so before it get ugly
I pack up my shit and just dip
Life on the road, can't trust a hoe,
can't trust a soul that's the way this shit goes
stay on your toes, blow up my phone
and tell me they miss me, I'm on my way home
and stop me feelin' empty consuming these drugs ain't nothing I'm regretting
sit on my own and start feelin depression
I feel a recession

Call and I text 'em, they act like they don't get the message

(Hook)

I just need someone to talk to, someone to listen
Ain't feeling myself feel like something been missing
Ain 't prayed in a minute, they just don't get it
I just need someone to talk to, someone to listen

I just need someone to talk to, someone to listen
Ain't feeling myself feel like something been missing
Ain 't prayed in a minute, they just don't get it
I just need someone to talk to, someone to listen

And someone to listen
And someone to listen
And someone to listen
I just need someone to talk to, someone to listen
