The Black

Vhs Collection

If life was a gun with only one bullet
And you were the one to walk right through it
Look up at the sun and you shout
you're best within, you're best without

With the black in my heart, with the black in my soul
These things are made to be let go
With the black in my heart, with the black in my soul
With the black in my heart, with the black in my soul
These things are meant to be let go
With the black in my heart, with the black in my soul

What's in my mind, what's in my mind after all?
Nothing but time, nothing but time is my fault
I'm floating between the white and black
You're best within, you're best without

With the black in my heart, with the black in my soul
These things are made to be let go
With the black in my heart, with the black in my soul
With the black in my heart, with the black in my soul
These things are meant to be let go
With the black in my heart, with the black in my soul

With the black in my heart, with the black in my soul
These things are made to be let go
With the black in my heart, with the black in my soul
With the black in my heart, with the black in my soul
These things are meant to be let go
With the black in my heart, with the black in my soul
