

September Girl

Human Nature

Left a message on your page
A night without you is gonna be strange
Baby, the time we spent together
Is gonna make me dream 'bout you forever
You rescued me and showed me the sun
My September love changed two into one
Now only the rain is gonna stop
Only the wind is gonna change
Seems only shameless feelings
Guide my love tonight
September sun, you made me see
September moon, make love to me
Dreams only give me strength
To wait another night, my September girl
Things remind me constantly
Of how you looked and kissed so sweet
You must be a fool to be my lover
But I ain't gonna treat you like no other
I'll cradle you 'cause you are the one
September love, my life's just begun
Now only the rain is gonna stop
Only the wind is gonna change
Seems only shameless feelings
Guide my love tonight
September sun, you made me see
September moon, make love to me
Dreams only give me strength
To wait another night, my September girl
Can somebody help me
To explain why I'm crying?
Can somebody bring you to me now?
Rescue me
Now only the rain is gonna stop
Only the wind is gonna change
Seems only shameless feelings
Guide my love tonight
September sun, you made me see
September moon, make love to me
Dreams only give me strength
To wait another night, my September girl
My September girl
