

Twilight Lullaby

Astorian Stigmata

I watch you while you sleep
And I listen while you think
I am that shadow she thought she saw
While she was laying in your arms last night
And I walk so slow down memory lane
Cause it always ends at your door

Cause you know
Where the darkness hides my light
And you know
How I die inside
I die inside

This room is dark and this knife is cold
I been chewing on my lips
So the truth can't be told
I see the reflection of your headlights
Dance across the window
No I won't go home alone
Tonight

(It's killing me to see you alive)
Cause you know
Where the darkness hides my light
Now you know
How to die

Don't you worry
It's not a dream
And I tear through your lungs
And I split your seams
Your dream is my nightmare
Your dream is my nightmare
I'm alive inside
I'm alive inside
